

## Working with Volume Groups/cloning a volume group via cli.txt

Clone a volume group in the Block Volume service via cli.

Use the `oci bv volume-group create` command and required parameters to clone a volume group from an existing volume group:

Command

Copy

Try It

```
oci bv volume-group create --compartment-id <compartment_ID> --availability-domain <external_AD> --source-details <Source_details_JSON>
```

For example:

Command

Copy

Try It

```
oci bv volume-group create --compartment-id ocid1.compartment.oc1..<unique_ID> --availability-domain ABbv:PHX-AD-1 --source-details '{"ty
```

For a complete list of flags and variable options for CLI commands, see the Command Line Reference.
