Working with Volume Groups/creating a volume group via cli.txt

create a volume group via cli

Use the oci bv volume-group create command and required parameters to create a volume group from existing volumes:

Command
Copy
Try It
```
oci bv volume-group create --compartment-id <compartment_ID> --availability-domain <external_AD> --source-details <Source_details_JSON>
```
Volume status must be available to add it to a volume group.

For example:

Command
Copy
Try It
```
oci bv volume-group create --compartment-id ocid1.compartment.oc1..<unique_ID> --availability-domain ABbv:PHX-AD-1 --source-details '{"ty
```
For a complete list of parameters and values for CLI commands, see the CLI Command Reference.
